Detailed Action

Withdrawal of Finality of Last Office Action

Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claim Rejections - 35 USC § 112

1. Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Because, claim 3 conflicts with its depend claim – claim 1 step e. Trying to initiate said first network link that already failed to establish in step e.
2. Similarly, claims 10, and 17 are rejected based on the same reasons set forth in the rejection of claim 3.

Response to Arguments

Application's argue with respect to claims 1-27 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent

Art Unit: 2142

granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 1-27 are rejected under 35 USC 102(e) as being anticipated by Schuster et al., (US Patent No. 6681252).

2. Regarding claim 1, Schuster teaches a method of establishing one of a plurality of network links on a computer system, comprising the steps of:

- a. Associating one or more alternative network link designations with one or more of said network links (Schuster, fig. 2, fig.3, and col.10, l.1-26);
- b. Requesting first network link of said plurality of network links (Schuster, Abstract, l.10-12, col. 7, l.19-30, col.11, l.34-36);
- c. Initiating said first network link (Schuster, col.7, l.31-45);
- d. Determining whether a particular alternative network link designation is associated with said first network link (Schuster, col. 9, l.24-42); and
- e. If said step c) fails to establish said first network link and if said particular alternative network link designation is associated with said first network link, initiating a particular network link of said plurality of network links based one said particular alternative network link designation (Schuster, col.10, l.27-35).

3. Regarding claim 2, Schuster further discloses a method as recited in claim 1 further comprising the steps of:

Art Unit: 2142

- f. Determining whether a second alternative network link designation is associated with said particular network link (Schuster, col. 10, l.1-9);
and
- g. If said step e) fails to establish said particular network link and if said second alternative network link designation is associated with said particular network link, initiating a second network link of said plurality of network links based on said second alternative network link designation (Schuster, col. 10, l.15-20).

4. Regarding claim 3, Schuster further discloses a method as recited in claim 1 further comprising the steps of:

- h. If said step e) fails to establish said particular network link, initiating said first network link (Schuster, for examine purpose the office choose to the approach of initiating the third link, col. 15, l.27-30).

5. Regarding claim 4, Schuster further discloses a method as recited in claim 1 further comprising the steps of:

- i. If said step e) fails to establish said particular network link, initiating a second network link of said plurality of network links based on said alternative network link designation (Schuster, col. 10, l.15-20).

6. Regarding claim 5, Schuster further discloses a method as recited in claim 1 further comprising the steps of:

Art Unit: 2142

- Indicating to a user whether said first network link was established (Schuster, col.3, l.38-40, which indicates the CLASS features is implemented and includes the notification).;
- and enabling said user to discontinue establishment of said particular network link (Schuster, col.3, l.38-40, which indicates the CLASS features is implemented and includes the activate/deactivate feature, col.1, l.55-56).

7. Regarding claim 6, Schuster further discloses a method as recited in claim 1 wherein said step b) includes:

- Sending a network open request to a shared library of said computer system (Schuster, col. 7, l.46-52, in which the SIP is open connection request for VoIP corresponds to the network open request to a shared library of computer system)

8. Regarding claim 7, Schuster further discloses a method as recited in claim 1 wherein Said computer system comprises a personal digital assistant (Schuster, col.5, l.53-55).

9. Regarding claims 8-14 ,claiming for computer-readable medium, have similar limitation as claims 1-7. Therefore, claims 8-14 are rejected under Schuster for the same reason set forth in the rejection of claims 1-7.

10. Regarding claims 15-21, claiming for computer system with a data bus, a processor couples to said data bus, and a memory device (Schuster, col.5, l.24-38),

Art Unit: 2142

have similar limitation as claims 1-7. Therefore, claims 15-21 are rejected under Schuster for the same reason set forth in the rejection of claims 1-7.

11. Regarding claims 22-27 have similar limitation as claims 1-3, and 5-7. Therefore, claims 22-27 are rejected under Schuster for the same reason set forth in the rejection of claims 1-3, and 5-7.
